MTP - brief overview

Discover the future of plant configuration with the Module Type Package (MTP)! Our standardized semantic description system enables you and your customers to easily and quickly engineer plants, laboratories, and equipment. Forget about manual adjustments and integrate modular plants through plug & produce - regardless of the automation system. MTP is the printer driver for production modules in the chemical, pharmaceutical, biotechnology, food, energy, and beverage industries.

Your advantages of MTP

- 50% reduction in time-to-market
- Increase of the flexibility of your plants by up to 80%
- 70% reduction of your engineering costs
- Configuration of plants instead of individual engineering
- Continuous technology from laboratories to pilot plants till production
- Technological leadership in the new market with MTP

SEMODIA's portfolio

Semodia supports you from the initial idea to implementation with services and products.

- **Plug-in for the MTP-Generation and -Import**
- **Solutions for laboratories and field devices**
- **MTP-Workshops und -Projects**
- **MTPlatform**
