The **MTPlatform** brings together all the players in the modular process industry

Managing MTPs has never been easier: edit, validate, save, research, download and upload MTPs with web-based editors, interfaces, and search functions.
The MTPlatform provides an easy-to-use interface for all stakeholders in the modular process industry and brings them together. Find your next module for your modular plant or be found as a module manufacturer - on the marketplace. Start uploading your MTP directly and subject it to a free validation to ensure it is compliant with the current standard. With the integrated MTP-Viewer, you also get a clear presentation of the MTP contents.

Register now free of charge!

Your advantages:

+ Maximum time savings
Simple marketplace searching, and purchase of suitable production modules equipped with standardized MTP.

+ Everything in one place
Have all MTPs in one place and mange them centrally.

+ Clear preview
The MTP-Viewer allows you a quick and clear view into the MTP.

+ Search and be found
Attractive advertising opportunities for module manufacturers to increase their outreach and to target equipment and laboratory operators.

+ Detailed validation
Ensure standard compliance through the integrated MTP validator.

+ Easy editing
Enjoy the possibility of subsequently editing your MTP in compliance with the VDI/VDE/NAMUR 2658 standard.
